Please see below image and steps for help on how to transfer correctly on wise. The steps must be completed in the exact order displayed below:

The screenshot shows the Wise website interface. At the top, there is a navigation bar with the Wise logo, 'Personal' and 'Business' tabs, and links for 'Money transfer', 'Multi-currency account', 'Help', 'EN', 'Register', and 'Log in'. A banner at the top left reads 'TransferWise is now Wise. Read more.' The main content area features a large promotional text: 'The international account 1.8x cheaper than Western Union.' Below this is a video player with a play button. To the right is a money transfer calculator. The calculator has two input boxes: 'You send' with the value '1,381.34' and currency 'USD', and 'Recipient will get exactly' with the value '1,000' and currency 'GBP'. A vertical list of costs is shown: '2.21 USD Bank debit (ACH) fee', '6.53 USD Our fee', '8.74 USD Total fees', '1,372.60 USD Amount we'll convert', and '0.728544 Guaranteed rate (8 hrs)'. At the bottom of the calculator, it states 'You could save vs banks 11.32 USD' and 'Should arrive in 2 hours'.

- 1) Change currency in the box that says 'You send' to **YOUR CURRENCY**.
- 2) Change currency in the box that says 'Recipient will get exactly' to **GBP**.
- 3) Enter the value we should get in the box that says 'Recipient will get exactly' to the exact price we give you.
- 4) The box that says 'You send' will automatically enter the value you will get charged in **YOUR CURRENCY**. You shouldn't have to input anything in that box apart from changing the currency to **YOUR CURRENCY**.
